

Our curriculum at CP Riverside School must consider the various starting points of our students, their passions and interests, their intended post-16 destinations and the expertise of our staff. Failing to acknowledge one of these criteria is likely to result in students disengaging from learning or not achieving the outcomes required to secure a meaningful and sustainable post-16 destination. Our curriculum must provide all students with enriching experiences both inside and outside of the classroom. We must work closely with employers and community groups to support our students to transition from the school environment into the wider world.

Our KS4 curriculum will seek to ensure that students spend as much time as possible learning in areas that are of interest and relevance for them now and in the future. KS4 students will benefit from enrichment being intertwined with careers and pathway curriculum choices. There will be a greater emphasis on core and pathway subjects

Post 16 Destination & Transition Preparedness
